INTERSLAT LINE A PRODUCT OF THE **ROBOTECNICS** COMPANY

The *econom* model of the INTERSLAT line of conveyors designed for conveying bulk of products. It has minimum inside parts and only one point of contact between the static body and the dynamic chain.

This provides improved reliability and decreases the wear of the chain and other dynamic parts. Most important, it is offered at a very attractive cost.

The INTERSLAT system of constructing modular assembly conveyors comprises plate top chain conveyor , belt conveyors, roll conveyors and conveyors for empty, neck support pet bottles. Conveyors for canteens and self service buffets.

Systems for handling, purification and separation of sludge from process liquids.

The company serves the pharmaceutical, food, cosmetics, detergent industries and robotics assisted assembly plants.

The ROBOTECNICS company specializes in automation applications, in general, and in machine construction, in particular.

The company develops machines for manufacturing process applications that are usually tailor made, such as packaging and filling machines, different types of handling systems, twist tunnels, worms and feed stars.
