The high speed rotary twin heads **pick & place** packer, Spider M-II, designed to serve the food, dairies and cosmetics industries for packing packs of products into pre formed packages.

This packer is one stage in a packing line, supplied by ROBOTECNICS as a turnkey system from the Filling machine, conveying to packing, special applications and storage.

The ROBOTECNICS company offers a range of equipment which includes tray forming, packers, stackers, palletizing, various conveyors for all sections and their dedicated functions.

The ROBOTECNICS company specializes in automation applications, in general, and in machine construction, in particular.

The company develops machines for manufacturing process applications that are usually tailor made, such as packaging and filling machines, different types of handling systems, twist tunnels, worms and feed stars.
